

Environmental Policy

Harrison Electropolishing is committed to minimizing the impact of its operations on the environment. Harrison Electropolishing has established a program and culture which strives to:

- Minimize waste by evaluating operations and improving efficiency where possible.
- Meet or exceed all relevant environmental legislation.
- Maintain conditionally exempt small quantity generator (CESQG) status.
- Minimize water and energy consumption by evaluating operations and improving efficiency where possible.
- Identify and purchase environmentally friendly supplies, where economically feasible.
- Recycle where possible.

These goals are achieved through a documented, implemented and maintained Environmental Management System (EMS) conforming to ISO 14001:2015. Top management ensures that every employee and supplier/sub-contractor understands and complies with the requirements of the organization's EMS. Established environmental objectives, policy, targets, procedures and instructions shall be periodically reviewed for adequacy, continuing suitability and effectiveness of this environmental management system.

A handwritten signature in black ink that reads "Tom Harrison". The signature is written in a cursive, flowing style.
